FAQ:

Q: Isn't leather hot in the summer and cold in the winter?

Leather conforms to its environment.

It adapts to the temperature of a room, or your body on it and will maintain a consistent temperature that will feel good on your skin.

We believe in "Basis on quality, and win from credit". We are committed to providing customers with high-quality products and meritorious services. We adopt the world's top-grade raw materials and good after-sales services in order to meet the needs of different customers, and continuously improve the development of our company.
